

## SANITATION

Among the Sustainable Development Goals (SDGs), sanitation is considered to be one of the most lagging, with an estimated 40% of the world's population still lacking what most of us take for granted: *access to adequate sanitation.*

## STATISTICS

1. An estimated 2.3 billion people still do not have basic sanitation facilities such as toilets or latrines.
2. An estimated 892 million still defecate in the open, for example, in street gutters or into open water bodies.
3. Inadequate sanitation accounts for an estimated 280, 000 diarrhea deaths.
4. Poor sanitation is significantly linked with transmission of diseases such as cholera, diarrhea, dysentery, hepatitis A, typhoid and polio.

World Humanitarian Foundation recognizes that “*health cannot be a question of income; it is a fundamental human right*”, and as such we are committed to improving sanitation in three key areas in resource poor communities in low- and middle- income countries around the globe.

We are committed to ensuring:

1. *Clean streets*
2. *Clean rivers*
3. *Proper defecation systems through provision of public toilets*

Come join hands with us, as we make the world a better place for all humanity.

## TARGET

*To achieve adequate sanitation in 75% of deprived communities by 2030.*

## STRATEGIC OBJECTIVES

1. Provision of **dust bins** at vantage points.
2. Supply of **waste trucks** to ensure regular pick up of the waste bins at these points.
3. Formation of **volunteer groups** within the communities to ensure sustainability of the clean environment and rivers.
4. Develop and implement a **tree planting program** in these communities.
5. **Chemical treatment** of polluted rivers.
6. Identify and take action to address potential contaminants to rivers.
7. **Educate** the public on ways of keeping the streets and rivers clean.
8. Assist communities in the formulation and implementation of laws that will protect rivers and ensure clean streets.
9. Provision of toilet facilities in communities.
10. Develop and implement effective sewage disposal systems in the communities.
11. Establish recycling equipment to ensure recycling of re-usable waste products.

Your **Donations** and **Help** will assist us in mobilizing resources including **trucks, waste bins, recycling equipment etc.** and establish systems to ensure that we meet our target.

*To Love Mankind is never an option  
but a Mandate*
